

# EVERYONE DESERVES A HEALTHY PREGNANCY

PREMATURITY PREVENTION INITIATIVE CAN HELP

## WHO WE ARE

The Prematurity Prevention Initiative engages pregnant individuals, the community, systems of healthcare and social service providers with a focus on preterm prevention. Preterm birth is when a baby is born too early or before the birthing person has reached at least 37 weeks (about 8-and-a-half months) of pregnancy.

## WHAT WE DO

We work to prevent premature births by increasing awareness of preterm birth risk factors. Our team strives to streamline patient access to effective medication regardless of racial/ethnic and socioeconomic status. We provide support and critical health information to pregnant individuals and families using resources such as:

- Timely and relevant data
- Provider-specific materials
- Community outreach
- Educational presentations
